We have been looking to represent a high performance, European built 2-Channel audio company with affordable components, and tightly controlled distribution for quite sometime. That is why we are extremely pleased to announce the addition of HEGEL Music Systems to the list of manufacturers represented by our firm.

All HEGEL products are designed in-house by HEGEL in Norway, based on technology not commonly found in residential music systems. The HEGEL patented SoundEngine™ audio modules are deeply rooted in advanced scientific research, utilizing the latest research results found within professional broadcast, semi-conductor and high-frequency technologies.

HEGEL's goal is to give music lovers the most natural and engaging listening experience possible. We hope you will take a moment to review some of HEGEL's exciting audio products included in the newsletter.

HEGEL D/A-Converters

HD2 High End USB Music Streamer / \$350.00 Retail

The HEGEL HD2 D/A-Converter offers a unique and affordable way to stream high resolution audio from your computer. You can use the HD2 between any modern computer and audio amplifier. When you connect the HD2 to your USB port, it automatically installs itself as an external USB soundcard on either PC's or MAC's! The HD2 has a high resolution 24 bit / 192 kHz D/A-Converter, and has the capability to stream high quality 24 bit / 96 kHz audio files over USB.

HD10 DAC / \$1,200.00 Retail

The HEGEL HD10 D/A-Converter offers a convenient way to connect all forms of new media players. The coaxial and optical connections allow you to significantly improve sound quality from a cable-TV decoder, satellite receiver, or any device with a digital PCM output. Or why not upgrade the sound of your SONUS System, or Apple Airport Express? The HD10 has a high resolution 24 bit / 192 kHz D/A-Converter inside to handle the most advanced music formats. The USB Port is Plug-N-Play, so no extra drivers need to be installed when playing back audio from your PC or MAC.

HD20 DAC / \$2,000.00 Retail

The HEGEL HD20 D/A-Converter offers a remote control to switch between inputs, dim the display, and adjust volume levels. The HD20 has a high performance digital preamplifier, fully capable of driving a high end power amplifier. The HD20 has a high resolution 24 bit / 192 kHz D/A-Converter inside to handle the most advanced music formats. The USB Port is Plug-N-Play, so no extra drivers need to be installed when playing back audio from your PC or MAC, and can stream 24 bit / 96 kHz files over USB.

HEGEL Integrated Amplifiers

[H70 Integrated Amplifier with USB Input / \\$1,995.00 Retail](#)

The new entry level Integrated Amplifier, HEGEL H70, offers a unique combination of power, finesse and versatility. Using the latest version of HEGEL's renowned SoundEngine amplifier modules, the H70 delivers 2x70 watts per channel. The H70 is the first Integrated Amplifier from HEGEL with a fully balanced pre-amplifier stage to reduce distortion. There is one optical and one digital input as well as a built in USB soundcard so you can easily connect to your computer. HEGEL's RC3 remote is included which controls functions on the H70 as well as other HEGEL components.

[H100 Integrated Amplifier with USB Input / \\$3,000.00 Retail](#)

The HEGEL H100, delivers 2x120 watts per channel into 8 ohms, and 2x220 watts per channel into 4 ohms, and carries much of the technologies developed for HEGEL's Reference Series Power Amplifiers. Compared to the H70, the H100 has a larger power supply, twice the number of output transistors, and incorporates FET-Technology, also know as HEGEL Next-Gen. This technology dramatically reduces higher order harmonic distortion, giving a smoother and more detailed sound that you just have to hear for yourself.

[H200 Integrated Amplifier / \\$4,400.00 Retail](#)

The HEGEL H200, delivers 2x200 watts per channel into 8 ohms, and 2x350 watts per channel into 4 ohms, with a dual mono power supply. A really nice feature of the H200 is the Home Theater Input, allowing you to combine it with an external surround sound system. Both balanced and unbalanced inputs, a relay switched input source selector, and digitally controlled active preamp stage make this integrated a true performer. The H200 uses the SoundEngine amplifier technology from the H4A mk2 power amplifier, reproducing dynamic, pure and powerful sound reproduction!

HEGEL CD Players

CDP2A mk2 CD Player / \$2,650.00 Retail

The HEGEL CDP2A mk2 CD player utilizes a HEGEL designed CD-Drive mechanism. This player has multilevel 24-bit 192 kHz converters for a truly balanced signal conversion, in addition to HEGEL's proprietary analog stages. The CDP2A mk2 has been awarded CD-Player of the Year from two different magazines as well as a "Best Buy". RC2 remote control is included.

CDP4A Reference CD Player / \$4,000.00 Retail

HEGEL designed the CDP4A from the ground up, to bring to market a reference standard in music reproduction. From the massive and complex power supply, a precise HEGEL master clock with an amazing low jitter level, the CDP4A simply sounds NATURAL.

HEGEL's CD-Drive mechanism with newly designed servo motors offers perfectly synchronized timing throughout the digital domain. The 2-button design and curved front panel gave HEGEL the Norwegian Design Councils "Award for Design Excellence." RC2 remote control included.

- ◆ 24 bit / 352 kHz multilevel DAC's with synchronized upsampling
- ◆ RCA Unbalanced and XLR balanced outputs
- ◆ Noise floor: Less than -130dB
- ◆ HEGEL SuperClock 2 jitter level: Less than 10ps
- ◆ Digital Output: 75 ohm SPDIF RCA connector
- ◆ Distortion: Less than 0.002%

HEGEL Preamps

[P4A mk2 Preamp / \\$4,600.00 Retail](#)

The P4A High End Reference Preamp is extremely user friendly with just 3 knobs on the front panel. One for On/Off, one for Source and a motorized volume control. It is also easily operated with the use of HEGEL's RC2 solid aluminum remote control. The P4A mk2 preamp utilizes true balanced internal signal processing, and has both unbalanced and balanced inputs and outputs. Six inputs are available on the back panel for the connection of your favorite sources. Currently available in silver only at this time to match with the H20 power amp.

[P30 Reference Preamp / \\$7,500.00 Retail](#)

The P30 is the best preamplifier ever developed by HEGEL. With its patented technology and hand matched components, the P30 is a confident contender in the race towards being the best preamplifier in the world.

The P30 volume regulator is a masterpiece unto itself. The physical volume control knob is only used to describe the desired volume output level to the array of Gigahertz MOS-transistors. These direct the music signal through a network of high quality resistors that reduce the signal level. After the volume control circuit, the signal is directed through the amplification circuit. For the first time, HEGEL is using the patented SoundEngine technology in a preamplifier! Combined with HEGEL's hand matched FET transistors, in total, the music signal will only pass through 2 transistors, and 1-3 resistors on its way through the P30!

The P30 also has a home theatre input that allows you to integrate it into a home theater system. Additional features include a 3.5mm IR-direct input and 12v trigger.

HEGEL Power Amps

[H20 Next-Gen Power Amp / \\$5,750.00 Retail](#)

The H20 is a remarkable power amplifier with power capabilities of more than 130 amps. Conservatively rated at 2x200 w/ch @ 8 ohms and 350 w/ch @ 4 ohms, there is plenty of power to drive the most demanding loudspeaker loads. Dual mono inputs, both balanced and unbalanced, with two pairs of heavy duty gold plated terminals. The H20 is the perfect match up to the P4A preamplifier at just over \$10k retail for the pair.

[H4SE Power Amplifier / \\$8,000.00 Retail](#)

The H4SE uses dual mono construction, developing a current output signal greater than 200 amps and conservatively rated at 2x300 w/ch @ 8 ohms. Each channel of the H4SE is divided into completely separate voltage gain and current gain stages, for higher dynamic range, better pinpointing of instruments, and a wider sound field. The H4SE uses laser trimmed HEGEL SoundEngine amplifier modules in the audio circuits for higher dynamic range and resolution.

Available in silver only, and a perfect match for the P4A preamplifier.

[H30 Power Amplifier / \\$15,000.00 Retail](#)

The H30 is HEGEL's best power amplifier ever, with 1,100 watts into 8 ohms, and can easily drive a one ohm load. Inputs include both unbalanced RCA and balanced XLR, with two pairs of heavy duty output terminals. The H30 can also be split, and used as a two channel power amplifier!

Simply stated, *"The H30 will simply let the music reach you in a different way than you have ever experienced before."*

The H30 is only available at this time in black.
